**Maximize Facility Comfort, Productivity, and Energy Efficiency with Building Automation**

Looking to conserve resources, cut costs, and increase productivity? Let Tucker Mechanical assist with planning, designing, and installing a Building Automation System (BAS) that will help you take complete control over your facility.

Our factory-certified automation designers, technicians, and electricians perform specialized building automation and controls services that improve your facility's comfort, productivity, and energy efficiency. Our experience ranges from internet-based open-architecture technologies to fully integrated complex pneumatic systems.

**State-of-the-Art BAS Technology**

Tucker Mechanical is an independent supplier of quality direct digital control (DDC) and BAS. Using state-of-the-art diagnostic and automated control technologies, we develop systems that help minimize building operation costs—without sacrificing occupant comfort.

**Representing Trusted Manufacturers**

We are proud to represent one of the largest, most trusted BAS system manufacturers in the industry. This relationship helps us develop solutions to meet virtually all of your operating goals.

**Our Advantages:**

- » **Flexibility:** We offer custom-designed building automation and controls as well as preventive maintenance and monitoring programs tailored to client needs and objectives
- » **Responsiveness:** Our team of highly trained field engineers responds quickly to emergency service calls
- » **Custom Solutions:** We offer customized building automation and controls solutions for virtually all commercial HVAC controls
- » **Collaboration:** We provide owner-assisted design-build systems for clients who prefer to be involved with their building operations
- » **Advanced Technology:** We utilize the latest in sophisticated BAS controls, and integrate them with existing controls systems

**Our BAS Services Include:**

- » Complete system design and integration
- » Installation
- » Programming
- » Networking
- » Commissioning
- » Graphics
- » Preventive and critical maintenance
- » Ongoing technical support
- » Automated controls for multiple building systems
